-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2652

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-14 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by the prior art of figure 5.

Applicant acknowledges that magnetic disk cartridges with center cores with the listed configuration and having dimensions within the listed dimension ranges are known (see the discussion of the prior art page 3).

Furthermore, with regard to the manufacturing process limitations set forth in claims 1 and 8 that the center core is processed by pressing or pressing and forging, it is noted that a "product by process" claim is directed to the product per se, no matter how actually made; see *In re Hirao*, 190 USPQ 15 at 17 (footnote 3, CCPA 1976); *In re Brown*, 173 USPQ 685 (CCPA 1972); *In re Luck*, 177 USPQ 523 (CCPA 1973); *In re Fessmann*, 180 USPQ 324 (CCPA 1974); *In re Thorpe*, 227 USPQ 964 (CAFC 1985).

The patentability of the Final product in a "product by process" claim must be determined by the product itself and not the actual process and an old or obvious product produced by a new method is not patentable as a product, whether claimed in "product by process" claims or not. Accordingly, the weight given to the "product by process" limitation is the structure "gleaned" from the process.

Art Unit: 2652

3. Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by BEUCH et al (6,160,680).

Note figures 5-7. BEUCH et al shows a magnetic disk cartridge with a center hub formed by pressing a sheet metal (see column 5 lines 22-25).

4. Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Iizuka et al (4,739,434).

Note figures 4 and 5. Iizuka et al shows a magnetic disk cartridge with a center hub formed by pressing a sheet metal (see column 3 lines 27-30).

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims are indefinite and improper. The listed alternatives (pressing or pressing with forging) are not equivalents.
